

Visual Magnetics' **MagnaMedia**[®]

the **#1 trusted brand** of ferrous films and papers worldwide

Over **300 leading retailers** have evolved using

VISUAL MAGNETICS GRAPHIC SYSTEM[®]

Offering unparalleled versatility, ease of installation,
cost effective shipping and endless potential uses!

MagnaMedia[®] is not a Magnet

MagnaMedia is an entirely unique material developed by Visual Magnetics. The **patented coating** on the underside of MagnaMedia is embedded with ferrous particles that are **magnetic receptive** and attract to **InvisiLock**[®] magnet backer. *Does not interfere with electronics.*

printed on VM-POLYeight®

Mix your MagnaMedia®

Available in a wide selection of **textures** and **finishes** that can easily reproduce high gloss, **high-resolution** photographic imagery or provide a **natural texture** to your graphics.
